

New Study Shows HIV-Positive Young Men at Risk of Low Bone Mass

The study was conducted at 15 clinical sites, including the Pediatric Clinical Research Center (PCRC) managed by CTSI's Clinical Research Services (CRS). Co-author [Kathleen Mulligan](#), PhD, said "the PCRC provided expert nursing and research support in a youth-friendly setting, which is essential for quality research in this vulnerable group." Save the Date: Annual CTSI Retreat July 25th

The UCSF community and CTSI partners are invited to participate in this annual event highlighting CTSI's progress and future plans. This year's retreat will focus on CTSI's evolution toward greater financial independence. [Read now](#)

UCSF and SF HIP at Forefront in Fighting Hepatitis in San Francisco

Viral hepatitis chronically infects between 3.5 and 5.2 million people in the U.S. — but only about one in three people who are infected know it. With more than 30,000 infections in San Francisco, the city is a clinical hot spot. UCSF researchers are at the forefront to prevent and treat the potentially life-threatening condition.
